

## Key Information Document IMPORTANT NOTICE:

MFP SICAV p.l.c. ('MFP') has followed the methodology prescribed by law (specifically, regulation known as 'PRIIPs') for the preparation of this document. PRIIPs requires that Performance Scenarios must be calculated using total return, being share price movements and dividend income, over the past ten years which, in MFP's view, may exceed reasonable expectations of future performance. Accordingly, MFP cautions investors against relying on this Key Information Document as a basis for potential future returns and should refer to the Scheme Particulars for further information.

## Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## What is this product?

**Type** Open ended UCITS fund

**Strategy** The objective of the Sub-Fund is to generate capital appreciation over a medium-term horizon with lower volatility relative to the broad equity markets. There is no guarantee that the investment objective of the Sub-Fund will be achieved and investment results may vary substantially over time. The Sub-Fund will achieve its investment objective by investing in multiple alternative strategies, including, but not limited to, some or all of the following strategies: Long Short Equity, Relative Value, Event Driven and Global Macro, each of which are described below. Long Short Equity Strategies generally seek to produce returns from investments in global equity markets by taking long and short positions in stocks and common stock indices. Long Short Equity Strategies can be differentiated in various ways and investment philosophies. Examples include market-neutral and long biased strategies. Relative Value Strategies contains a wide range of investment techniques that are intended to profit from price or rate inefficiencies. The strategies usually exploit the pricing discrepancies by taking a position in one financial instrument and simultaneously taking an offsetting position in a related instrument. Examples include volatility and credit arbitrage. Event Driven Strategies generally imply investment in securities of companies undergoing corporate events and take advantage of the temporary stock mispricing that can occur before or after the event. Examples include mergers, acquisitions and reorganisations. Global Macro Strategies can take long and short positions various asset classes and futures markets based on macro-economic opportunities. Global Macro Strategies are considered among the least-restricted strategies as they generally can place any type of trade using various instruments. The Sub-Fund intends to invest in a wide range of transferable securities, financial derivative instruments and other eligible securities, including Collective Investment Schemes. The Sub-Fund does not have geographical, market capitalization or rating bias for Eligible Securities, but can invest across all types of Eligible Securities within the above-mentioned strategies in order to fulfil its investment objectives. The Sub-Fund uses financial derivative instruments for hedging, efficient portfolio management and/or investment purposes.

**Intended Investor** This product is best suited for investors who are willing to tolerate a medium level of volatility in the value of their investment while aiming for a consistent increase of their capital. This strategy suits investors with an investment horizon of 3 years.

**Term** This product is open ended.

## What are the risks and what could I get in return?

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level and poor market conditions are unlikely to impact the capacity for you to receive a positive return on your investment.

The following are some of the other risks materially relevant to the PRIIPs which are not taken into account in the summary risk indicator:

They may include or relate to, among others, equity market, bond market, foreign exchange, interest rate, credit, market volatility and political risks and any combination of these and other risks.

You can find more information about the other risks in the prospectus and the offering supplement at:

[www.i4gam.com/documents/](http://www.i4gam.com/documents/).

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

### Performance Scenarios

Recommended holding period: 3 years

Example Investment: €10,000

		if you exit after 1 year	if you exit after 3 years
<b>Stress Scenario</b>	What you might get back after costs	€ 3,931	€ 4,591
	Average return each year	-60.7%	-22.9%
<b>Unfavourable scenario</b>	What you might get back after costs	€ 8,705	€ 8,287
	Average return each year	-13.0%	-6.1%
<b>Moderate scenario</b>	What you might get back after costs	€ 9,737	€ 9,553
	Average return each year	-2.6%	-1.5%
<b>Favourable scenario</b>	What you might get back after costs	€ 10,755	€ 10,365
	Average return each year	7.6%	1.2%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product, and the HFRX Absolute Return as a suitable benchmark, over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between the end of Mar 2017 and the end of Mar 2020.

The moderate scenario occurred for an investment between the end of Sep 2018 and the end of Sep 2021.

The favourable scenario occurred for an investment between the end of Dec 2018 and the end of Dec 2021.

### What happens if MFP Sicav p.l.c. is unable to pay out?

For your protection the company's assets are held with a separate company, a depositary, so the fund's ability to pay out would not be affected by the insolvency of MFP Sicav p.l.c.. If the fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment.

## What are the costs?

The person selling to you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

### Table 1: Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- €10,000 is invested

	If you exit after 1 year	If you exit after 3 years
<b>Total costs</b>	€ 697	€ 1,472
<b>Annual cost impact (*)</b>	6.97%	4.88%

\* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.4% before costs and -1.5% after costs.

### Table 2: Composition of costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- The meaning of the different cost categories.

			If you exit after 1 year
<b>One-off costs upon entry or exit</b>	Entry costs	The impact of the costs you pay when entering your investment. [3.00%]	€ 300
	Exit costs	The impact of the costs of exiting your investment when it matures. [0%]	€ 0
<b>Ongoing costs taken each year</b>	Transaction costs	The impact of the costs of us buying and selling underlying investments for the product. [0.34%]	€ 35
	Management fees and other administrative or operating costs	The impact of the costs that we incur each year for managing your investments. [3.62%]	€ 362
<b>Incidental costs taken under specific conditions</b>	Performance fees	20% of the Sub-Fund's net return per year in excess of the hurdle rate of 5% and high water mark (*). [0%]	€ 0

(\*) The higher of (a) the Initial Offering Price, and (b) the highest NAV per share on which a performance fee was paid.

## How long should I hold it and can I take my money out early?

### Recommended holding period: 3 years

This product has no required minimum holding period but is designed for long term investment; you should be prepared to stay invested for at least 3 years.

## How can I complain?

If you have any complaints about the product or conduct of the manufacturer or the person advising on, or selling the product, you may lodge your complaint in one of the following ways:

- You may log your complaint via email [info@i4gam.com](mailto:info@i4gam.com).
- You may send your complaint in writing to: Complaints Department, MFP Sicav p.l.c., 7, Triq il-Kbira, Naxxar NXR 1800, Naxxar, Malta.

## Other relevant information

The cost performance and risk calculations used in this document follow the methodology prescribed by EU rules. We are required to provide you with further documentation, such as the product's latest Prospectus, annual and semi-annual reports. These documents and other product information are available online at [www.i4gam.com](http://www.i4gam.com).
