

Key Information Document IMPORTANT NOTICE:

MFP SICAV p.l.c. ('MFP') has followed the methodology prescribed by law (specifically, regulation known as 'PRIIPs') for the preparation of this document. PRIIPs requires that Performance Scenarios must be calculated using total return, being share price movements and dividend income, over the past ten years which, in MFP's view, may exceed reasonable expectations of future performance. Accordingly, MFP cautions investors against relying on this Key Information Document as a basis for potential future returns and should refer to the Scheme Particulars for further information.

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

This key investor information is accurate as at 03 May 2023.

What is this product?

Type Open ended UCITS fund.

Strategy The objective of the Sub-Fund is to generate capital appreciation over a long-term horizon by investing in equities on a global basis. There is no guarantee that the investment objective of the Sub-Fund will be achieved and investment results may vary substantially over time. The Sub-Fund's assets are invested in equities of companies that have an Environmental, Social and Corporate Governance (ESG) focus. Within the security selection process, the sub-fund applies generally accepted strategies for the implementation of the ESG approach. The ESG performance of a company is evaluated independently from financial success based on a variety of indicators, which consider ecological and social objectives as well as corporate governance. For the assessment, transparency as well as the product and service range of a company will be taken into consideration. The Sub-fund's approach is to be a long-term investor in its chosen stocks. It will not adopt short-term trading strategies. The investment process comprises two different sets of selection criteria: The first selection process will follow stringent investment criteria in selecting securities for the Sub-fund's investment portfolio. These criteria aim to ensure that the Sub-fund invests in high quality companies: That realize a high and sustainable return on operating capital employed; That realize high and sustainable free cash flows; Who dispose of competitive advantages which are difficult to replicate; which do not require significant leverage to generate returns; with a strong growth profile; that are resilient to change, particularly technological innovation; whose valuation is considered by the Sub-fund to be attractive. In a second phase, the shortlisted equities will be screened on the ESG parameters and final selection will be made in line with the internal ESG policy of the Investment Manager. Investors should be aware that the application of these investment criteria significantly limits the number of potential investments which the Sub-fund will consider to be appropriate investments for the Sub-fund's portfolio. The Sub-Fund does not have a geographical bias but will mainly consist of companies in developed markets and listed on regulated exchanges. The Sub-Fund will mainly invest in equities with a market capitalization covering large to mid-cap companies.

Intended Investor This is a growth-oriented portfolio that is best suited for long-term investors who are willing to accept a higher volatility and are not in need of an annual income. This strategy suits investors with an investment horizon of 5 years.

Term This product is open ended.

What are the risks and what could I get in return?

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level and poor market conditions could impact the capacity for you to receive a positive return on your investment.

The following are some of the other risks materially relevant to the PRIIPs which are not taken into account in the summary risk indicator:

They may include or relate to, among others, equity market, bond market, foreign exchange, interest rate, credit, market volatility and political risks and any combination of these and other risks.

You can find more information about the other risks in the prospectus and the offering supplement at: www.i4gam.com/documents/.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Performance Scenarios

Recommended holding period: 5 years

Example Investment: €10,000

		if you exit after 1 year	if you exit after 5 years
Stress Scenario	What you might get back after costs	€ 3,019	€ 2,645
	Average return each year	-69.8%	-23.4%
Unfavourable scenario	What you might get back after costs	€ 7,968	€ 8,262
	Average return each year	-20.3%	-3.8%
Moderate scenario	What you might get back after costs	€ 10,577	€ 15,634
	Average return each year	5.8%	9.4%
Favourable scenario	What you might get back after costs	€ 13,440	€ 17,947
	Average return each year	34.4%	12.4%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product, and the MSCI World Net Total Return Eur Index as a suitable benchmark, over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between the end of Aug 2021 and the end of Apr 2023.

The moderate scenario occurred for an investment between the end of Sep 2015 and the end of Sep 2020.

The favourable scenario occurred for an investment between the end of Aug 2013 and the end of Aug 2018.

What happens if MFP Sicav p.l.c. is unable to pay out?

For your protection the company's assets are held with a separate company, a depositary, so the fund's ability to pay out would not be affected by the insolvency of MFP Sicav p.l.c.. If the fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment.

What are the costs?

The person selling to you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Table 1: Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- €10,000 is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	€ 545	€ 1,776
Annual cost impact (*)	5.45%	2.99%

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 12.3% before costs and 9.3% after costs.

Table 2: Composition of costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- The meaning of the different cost categories.

			If you exit after 1 year
One-off costs upon entry or exit	Entry costs	The impact of the costs you pay when entering your investment. [3.00%]	€ 300
	Exit costs	The impact of the costs of exiting your investment when it matures. [0%]	€ 0
Ongoing costs taken each year	Transaction costs	The impact of the costs of us buying and selling underlying investments for the product. [0.15%]	€ 15
	Management fees and other administrative or operating costs	The impact of the costs that we incur each year for managing your investments. [2.30%]	€ 230
Incidental costs taken under specific conditions	Performance fees	This product does not have any performance or other incidental fees. [0%]	€ 0

(*) The higher of (a) the Initial Offering Price, and (b) the highest NAV per share on which a performance fee was paid.

How long should I hold it and can I take my money out early?

Recommended holding period: 5 years

This product has no required minimum holding period but is designed for long term investment; you should be prepared to stay invested for at least 5 years.

How can I complain?

If you have any complaints about the product or conduct of the manufacturer or the person advising on, or selling the product, you may lodge your complaint in one of the following ways:

- You may log your complaint via email info@i4gam.com.
- You may send your complaint in writing to: Complaints Department, MFP Sicav p.l.c., 7, Triq il-Kbira, Naxxar NXR 1800, Naxxar, Malta.

Other relevant information

The cost performance and risk calculations used in this document follow the methodology prescribed by EU rules. We are required to provide you with further documentation, such as the product's latest Prospectus, annual and semi-annual reports. These documents and other product information are available online at www.i4gam.com.
