Key Information Document (KID)

MFP SICAV p.l.c. ('MFP') has followed the methodology prescribed by law (specifically, regulation known as 'PRIIPs') for the preparation of this document. PRIIPs requires that Performance Scenarios must be calculated using total return, being share price movements and dividend income, over the past ten years which, in MFP's view, may exceed reasonable expectations of future performance. Accordingly, MFP cautions investors against relying on this Key Information Document as a basis for potential future returns and should refer to the Scheme Particulars for further information.

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

This Key Information Document is dated 26/06/2026.

What is this product?

Type

Open ended UCITS fund.

Term

This product is open ended.

Objectives

The Global Systematic Fund aims to achieve long-term capital appreciation through a disciplined, quantitative investment approach. The Fund seeks to capture market trends using systematic strategies guided by proprietary indicators, with a focus on maintaining a balanced risk profile. There is no guarantee that the investment objective of the Sub-Fund will be achieved and investment results may vary substantially over time.

The Sub-Fund utilizes a disciplined, quantitative approach based on dual moment indicators and proprietary "market breath" metrics to identify and capitalize on favorable market trends while managing risk effectively. The Sub-Fund invests in stocks from the S&P 500 and Eurostoxx 600 indices. Each month, the Sub-Fund selects the top 25 stocks from the S&P 500 and Eurostoxx 600 based on positive trend indicators and high investor demand. The Sub-Fund adjusts its exposure to equities based on the number of stocks exhibiting positive trends. Equity allocation can range from 0% to 100%.

To manage risk, the Sub-Fund allocates capital to a dynamic protection mechanism, which includes government bonds, gold, hard currencies (USD and EUR), money market funds, term deposits, and other defensive assets. This allocation can range from 0% to 100%. The portfolio is reviewed and rebalanced on a monthly basis. This involves adjusting the equity allocation and the dynamic protection mechanism based on current market conditions and investment indicators.

Investments are diversified across sectors and industries within the S&P 500 and Eurostoxx 600 indices. Diversification is also applied within the defensive assets, including various government bonds, currencies, and precious metals, to enhance risk management.

The Sub-Fund may gain exposure to precious metals solely through instruments that qualify as eligible investments in accordance with Article 50(1) of the UCITS Directive. This ensures adherence to the investment restrictions set out for UCITS-compliant schemes.

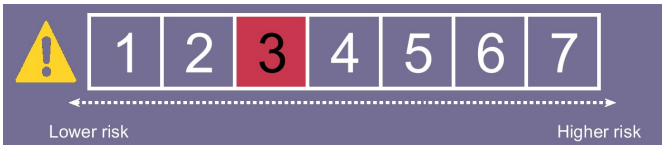
The Sub-Fund employs systematic risk controls to manage exposure and protect capital. This includes adjusting the equity allocation based on trend signals and utilizing the dynamic protection mechanism to mitigate potential downside risk. The Sub-Fund maintains sufficient liquidity to meet redemption requests and to take advantage of market opportunities. This is achieved through investments in money market instruments and term deposits. The Sub-Fund's investment strategy is based on a systematic, rule-based process designed to balance growth potential with a moderate risk profile. The approach aims to provide consistent performance through disciplined asset allocation and dynamic risk management.

These are accumulating shares.

Intended Investor

This is a growth-oriented portfolio that is best suited for long-term investors who are willing to accept a higher volatility and are not in need of an annual income. This strategy suits investors with an investment horizon of 5 years.

What are the risks and what could you get in return?



The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

The following are some of the other risks materially relevant to the PRIIPs which are not taken into account in the summary risk indicator:

They may include or relate to, among others, equity market, bond market, foreign exchange, interest rate, credit, market volatility and political risks and any combination of these and other risks.

You can find more information about the other risks in the prospectus and the offering supplement at: www.i4gam.com/documents/.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product, and/or a suitable proxy, over the last 10 years. Markets could develop very differently in the future.

Performance Scenarios

Recommended holding period: 5 years

Example Investment: €10,000

Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.

		If you exit after 1 year	If you exit after 5 years
Stress Scenarios	What you might get back after costs	€6,180	€5,420
	Average return each year	-38.2%	-11.5%
Unfavourable Scenarios	What you might get back after costs	€8,700	€12,120
	Average return each year	-13.0%	3.9%
Moderate Scenarios	What you might get back after costs	€10,710	€14,070
	Average return each year	7.1%	7.1%
Favourable Scenarios	What you might get back after costs	€12,930	€15,990
	Average return each year	29.3%	9.8%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment using a suitable proxy between 01/2025 and 05/2026.
The moderate scenario occurred for an investment using a suitable proxy between 02/2019 and 02/2024.
The favourable scenario occurred for an investment using a suitable proxy between 03/2020 and 03/2025.

What happens if MFP Sicav p.l.c. is unable to pay out?

For your protection the company's assets are held with a separate company, a depositary, so the fund's ability to pay out would not be affected by the insolvency of MFP Sicav p.l.c.. If the fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product, and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- €10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total Costs	€144	€830
Annual cost impact (*)	1.4%	1.4% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.5% before costs and 7.1% after costs.

Composition of costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- The meaning of the different cost categories.

			If you exit after 1 year
One-off costs upon entry or exit	Entry costs	[0.0%] The impact of the costs you pay when entering your investment.	€0
	Exit costs	[0.0%] The impact of the costs of exiting your investment when it matures.	€0
Ongoing costs taken each year	Management fees and other administrative or operating costs	[1.1%] The impact of the costs that we incur each year for managing your investments.	€115
	Transaction costs	[0.1%] The impact of the costs of us buying and selling underlying investments for the product.	€5
Incidental costs taken under specific conditions	Performance fees	[0.2%] 15% if the NAV at the end of the quarter is higher than the highest NAV at the end of the previous quarters or higher than the Initial Offering Price calculated on the NAV of each Valuation Day. The Performance fee is calculated on a “high water mark” principle.	€24

How long should I hold it and can I take my money out early?

Recommended holding period: 5 years

This product has no required minimum holding period but is designed for long term investment; you should be prepared to stay invested for at least 5 years.

How can I complain?

If you have any complaints about the product or conduct of the manufacturer or the person advising on, or selling the product, you may lodge your complaint in one of the following ways:

- You may log your complaint via email info@i4gam.com.
- You may send your complaint in writing to: Complaints Department, MFP Sicav p.l.c., 7, Triq il-Kbira, Naxxar NXR 1800, Naxxar, Malta.

Other relevant information

The cost performance and risk calculations used in this document follow the methodology prescribed by EU rules. We are required to provide you with further documentation, such as the product’s latest Prospectus, annual and semi-annual reports. These documents and other product information are available online at www.i4gam.com.
